EDUCATION

2005 - 2010	UNIVERSITY OF SANTO TOMAS Bachelor of Science degree in Electronics and Communications Engineering, March 2010
2001 - 2005	PACO CATHOLIC SCHOOL Secondary Education Diploma, March 2005

PROFESSIONAL EXPERIENCE

December 2011 to present

TOC System Support Engineer, ABS-CBN CORPORATION

- Maintain program continuity of the company's multi-channel playout system and TOC workflows through providing technical support of its video servers, broadcast automation, datamover, database, communication systems, video routers and other core broadcast equipment.
- Manage assets by going through a series of workflows for several purposes such as archiving, transcoding, and restoring to video servers to meet the demands of the playout.
- Design and improve broadcast systems to meet future demands of the broadcasting industry.
- Configure several broadcast software and equipment such as automations, video routers, logo inserters, frame synchronizers and graphics machines to cater the needs of the playout system.
- Investigate technical operations related incidents through analysis of logs present on intervening broadcasting devices and software and respond in a timely and effective manner by providing technical troubleshooting.
- Coordinate with equipment suppliers regarding product inquiries, configuration and escalation support.

Master Control Room Engineer, ABS-CBN CORPORATION

- Responsible for the core of the station's technical facilities.
- Responsible for the acquisition of live and recorded media via Studio feed, Satellite, Fiber, IP Technology from in-house and third-party broadcast production facilities.
- Routing and switching of feeds, based on the booking requirements of studio production, post-production, ingest and playout.
- Critical assessment of audio and video feeds through quality control, monitoring, measurement and adjustment to ensure that all media are within broadcast standards.
- Proactive monitoring of feeds and rapid restoration to on-air issues encountered using pre-defined emergency procedures on a 24/7 operation basis.
- Provide technical support to broadcast equipment and systems through installation, testing, and commissioning of designed broadcast systems.
- Maintain business continuity process by performing preventive and corrective procedures to ensure minimum disruption of services from equipment failures.
- Perform ad-hoc tasks as needed.

September 2010 – November 2011

Headend Staff, CABLELINK AND HOLDINGS CORPORATION

- Maintain all cable channels within required levels.
- Maintain all satellite dish alignment to its optimal level.
- Responsible for reorganizing channel groups and headend facility management through structured cabling and inventory.
